### Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

|                                                                                                                                                                                                                                                                       |                                         |                                                                                                                                                                                                                                       |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p><b>SAYS</b></p> <ul style="list-style-type: none"> <li>• <b>I want to grow the most suitable crop for my land.</b></li> <li>• I need accurate recommendations to improve crop yield.</li> <li>• Weather conditions greatly affect my farming decisions.</li> </ul> |                                         | <p><b>THINKS</b></p> <ul style="list-style-type: none"> <li>• Which crop will give me maximum profit?</li> <li>• Is my soil suitable for the crop I want to grow?</li> <li>• Can technology help me reduce farming losses?</li> </ul> |
| <p><b>DOES</b></p> <ul style="list-style-type: none"> <li>• Tests soil nutrients such as Nitrogen, Phosphorous, and Potassium.</li> <li>• Collects weather information like rainfall and temperature.</li> </ul>                                                      | <p><b>Farmer</b><br/>(Primary User)</p> | <p><b>FEELS</b></p> <ul style="list-style-type: none"> <li>• Confused while selecting the right crop.</li> <li>• Concerned about low crop yield and financial loss.</li> <li>• Happy and confident when receiving</li> </ul>          |

• Collects weather information like rainfall and temperature.

accurate crop recommendations.
